

Samath Aravinda, UXC

Principal Product Designer / Senior Product Manager

EXPERIENCE - 17+ YEARS IN TOTAL

Principal Product Designer | Product Design Lead | Senior Product Manager

Zuellig Pharma Singapore

Enterprise Product Strategy · UX & Design Leadership · B2B

Commerce · Product Analytics · AI/UX

Dec 2021 - Present - Singapore (5 years)

- Lead product design strategy for eZRx+, a B2B digital commerce platform operating across 9 countries, driving consistent and scalable experiences across complex pharmaceutical ordering, payments, returns and fulfilment journeys.
- Partner with regional product, commercial, technology and market stakeholders to align user needs, business requirements and product strategy, establishing standardised solutions while accounting for market-specific requirements.
- Lead end-to-end product design across discovery, research, journey mapping, service design, information architecture, prototyping, usability testing and design validation.
- Define and evolve UX patterns and design-system standards across 10+ digital products, improving consistency, scalability and collaboration between design and engineering teams.
- Influence product roadmaps and prioritisation by translating customer insights, behavioural data and business requirements into product opportunities and UX improvements.
- Work across multiple markets to identify common product problems, establish reusable design solutions and reduce fragmented experiences across the platform.
- Use Mixpanel and product analytics to analyse user behaviour, funnels, conversion and product adoption, translating insights into design and product improvements.
- Manage CleverTap engagement initiatives, using behavioural segmentation, campaigns and in-product communications to support product adoption, retention and customer engagement.
- Mentor and guide designers while establishing UX standards, design reviews, governance and cross-functional ways of working.
- Collaborate closely with Product, Engineering, Commercial, Operations and Market teams throughout discovery, delivery and post-launch optimisation.

Samath Aravinda, UXC

Principal Product Designer / Senior Product Manager

EXPERIENCE

Senior Product Manager - eZ Engage, eZ Tender, eZ Flow & Digital Platforms

- Lead product management responsibilities across eZEngage, eZTender and Sitecore-based digital platforms, covering product discovery, requirements, prioritisation and delivery with Cross charge model.
- Translate business and requirements into product strategies, roadmaps, user stories and prioritised feature backlogs with cross charge model.
- Work with technology, business and market stakeholders to define product requirements and align delivery with commercial and operational objectives.
- Manage and prioritise multiple concurrent initiatives across 8 client-facing digital projects, balancing business priorities, customer needs, technical constraints and delivery timelines.
- Use Mixpanel, CleverTap and behavioural data to identify adoption opportunities, understand customer journeys and support data-informed product decisions.
- Coordinate cross-functional teams across Engineering, Marketing and business stakeholders to move initiatives from discovery through delivery and optimisation.

Senior UX Designer

Govtech Singapore

Dec 2020 - Dec 2021 - Singapore

- Led UX design as the sole senior UX designer across two Smart Nation initiatives, taking projects from research and discovery through prototyping, validation and delivery.
- Conducted user interviews and research with government stakeholders and end users to identify operational needs and usability challenges.
- Developed user journeys, information architecture, interaction models and high-fidelity prototypes to simplify complex government workflows.
- Presented UX recommendations and design solutions to senior government stakeholders, influencing product direction and implementation.
- Worked closely with product and technology teams within agile delivery environments to translate research insights into practical digital solutions.
